

Hyper System

**Faster.
Smarter.
Safer.**

The hyper-fast system for
monitoring VH2O2
sterilization processes.

5' Hyper System

Identification label
with process indicator

■ Not exposed
■ Exposed

Spore carrier with
Geobacillus
stearothermophilus

*Biological Indicators
for Plasma or Vaporized
Hydrogen Peroxide
sterilization*

FDA cleared!

Top performance. Compliance adherence.

Fast results. Greater efficiency.

- 5-minute readout for fast and reliable load release.
- Save 10–19 minutes compared to competitive systems.
- Reduce downtime and optimize workflow efficiency.

Advanced & innovative design.

Smart technology. Simple operation.

- Automatic incubation. No setup required.
- Remote monitoring via Bionova® Q, Bionova® Cloud or Wireless Assistant.
- Maintenance-free with self-diagnostic technology.
